

# Discover better biologics characterization solutions.

Join us to learn more about our leading portfolio of protein and nucleic acid characterization instruments and assay kits.

Leveraging microfluidic capillary electrophoresis, our LabChip® systems enable rapid characterization with minimal sample preparation setup and sample input volume.

Our systems include:

- LabChip GXII Touch™ for proteins and nucleic acids
- LabChip GX Touch for nucleic acids only

*For research use only. Not for use in diagnostic procedures.*

## Event Details:

Tuesday, March 26, 2024  
12 - 1 PM PT

MBC BioLabs  
135 Mississippi St  
San Francisco, CA 94107

Lunch will be provided.
